

#Jenny

Finally I get this ebook, thanks for all these I can get now!

#Rio

Cool! I'am really happy

#Markus Jensen

I did not think that this would work, my best friend showed me this website, and it does! I get my most wanted eBook

#Hun Tsu

wtf this great ebook for free?!

#Che Salsa

My friends are so mad that they do not know how I have all the high quality ebook which they do not!

#Diego Butler

so many fake sites. this is the first one which worked! Many thanks

Algebra 1 Chapter 1 Test Review

Short Answer

Write an algebraic expression for the phrase.

- the sum of b and 11
- the product of g and 4
- 4 times the sum of g and p
- -2 times the quantity q minus 3

Define a variable and write an expression for the phrase.

- the quotient of 6 times a number and 16
- 4 minus a number
- The total cost to rent a row boat is 518 times the number of hours the boat is used. Write an equation to model this situation if c = total cost and h = number of hours.

8. What equation models the data in the table if d = number of days and v = cost?

Days	Cost
1	44
2	66
3	110
6	132

- Evaluate $a + xy$, for $a = 18$, $x = 10$, and $y = 8$.
- A pair of shoes costs \$52.00 and the state sales tax is 8%. Use the formula, $C = p + sp$ to find the total cost of the shoes, where C is the total cost, p is the price, and r is the sales tax rate.
- Evaluate the expression $(ab)^2$ for $a = 4$ and $b = 3$.
- You can use the formula, $C = \frac{5}{9}(F - 32)$ to convert temperature in degrees Fahrenheit, F , to temperature in degrees Celsius, C . What is 62°F in degrees Celsius? Round your answer to the nearest tenth.

Simplify the expression.

- $\sqrt{(15 - 3)^2 + 4}$
- $4(20 + 12) + (4 - 3)$
- $-9 + 6$
- $-4.8 - (-4.10) + 5.7$
